

2001
THE BEGINNING

UDDI

THE YELLOW PAGES
OF THE INTERNET

- Service Registry
- WSDL Contracts
- SOAP Endpoints
- Manual Integration
- Static Discovery

THE DREAM

Software finds software.
They connect. They just work.

WHY IT FAILED

- Too much complexity
- Centralized trust didn't scale
- Humans still in the loop
- No intelligence layer

THEN: INTEGRATION

Systems connected

FROM UDDI TO MCP

The Internet Keeps Reinventing Itself.
This Time, We Get It Right.

THE FORGOTTEN BRIDGE
HAILSTORM
.NET MY SERVICES

AHEAD OF ITS TIME

- Identity-centric services
- Personal data APIs
- Cross-service orchestration

THE VISION

Identity + Context + Services
Working together

2024+

MCP & AGENT ECOSYSTEM
INTELLIGENCE CHANGES EVERYTHING

WHAT CHANGED

STRUCTURAL
→ SEMANTIC
From contracts
to intent

INTELLIGENCE
LAYER
We added
reasoning

DECENTRALIZED
ECOSYSTEM
No single
registry

DEVELOPER
FIRST
Built by devs,
adopted by all

THE ROAD AHEAD

COGNITIVE ENDPOINTS
Expose capabilities,
not just APIs

SKILLS > APIs
What can you do?
Not how you do it.

DISCOVERY RETURNS
Smarter, ranked,
intent-driven

IDENTITY RETURNS
Agents act on your
behalf, securely

THE RISK

Fragmentation • Over-governance
Trust gaps • Noise in discovery

UDDI ASKED:
HOW DO SYSTEMS FIND EACH OTHER?
MCP ASKS:
HOW DO SYSTEMS UNDERSTAND EACH OTHER?

2001 WAS RIGHT. 2026 IS READY.
THE FUTURE OF AGENTIC AI IS FINALLY HERE.

NOW: COLLABORATION

Systems work together

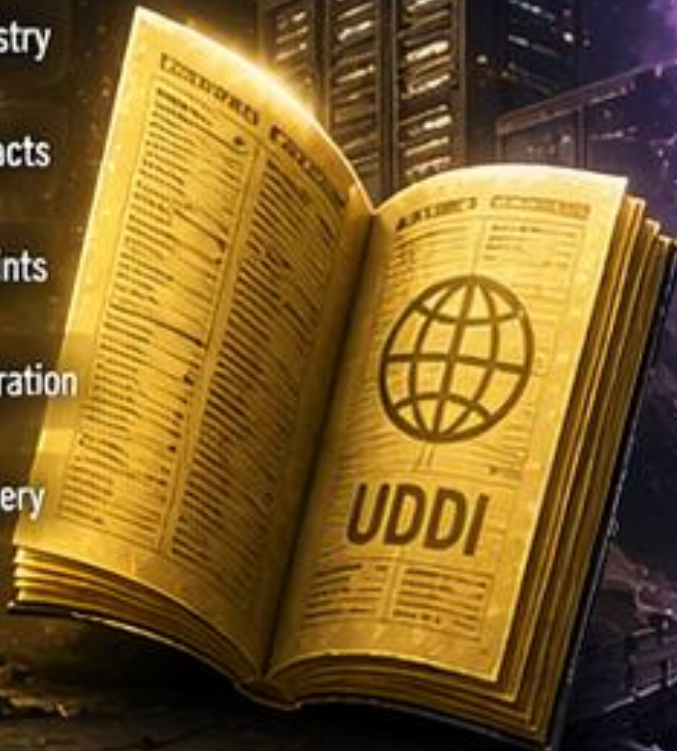

2001
THE BEGINNING

UDDI

THE YELLOW PAGES
OF THE INTERNET

-  Service Registry
-  WSDL Contracts
-  SOAP Endpoints
-  Manual Integration
-  Static Discovery

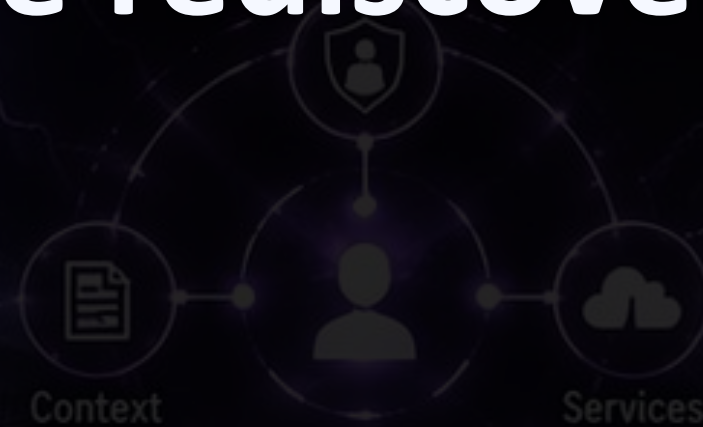

FROM UDDI

The Internet Keeps Reinventing
This Time, We Get It Right

THE FORGOTTEN BRIDGE

We didn't invent it. We rediscovered it.

THE DREAM

Software finds software.
They connect. They just work.

THEN: INTEGRATION

Systems connected

WHY IT FAILED

- ❌ Too much complexity
- ❌ Centralized trust didn't scale
- ❌ Humans still in the loop
- ❌ No intelligence layer

AHEAD OF ITS TIME

- Identity-centric services
- Personal data APIs
- Cross-service orchestration

THE VISION

Identity + Context + Services
Working together

UDDI

The original dream

2001 WAS RIGHT. 20

THE FUTURE OF AGENTIC AI

Context

Services

AHEAD OF ITS TIME

- Identity-centric services
- Personal data APIs
- Cross-service orchestration

THE VISION

Identity + Context + Services
Working together

UDDI ASKED:
HOW DO SYSTEMS FIND EACH OTHER?

IDENTITY &
PERMISSIONS

TRUST &
GOVERNANCE

STRUCTURAL
→ SEMANTIC
From contracts
to intent

INTELLIGENCE
LAYER
We added
reasoning

DECENTRALIZED
ECOSYSTEM
No single
registr

The idea was right.
The timing was wrong.

Microsoft Hailstorm

Identity before identity
was ready

THE YELLOW PAGES
OF THE INTERNET

Service Registry

WSDL Contracts

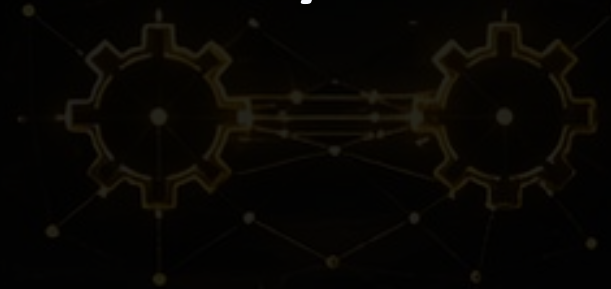

SOAP Endpoints

Static Discovery

Software finds software.
They just work.

THE FORGOTTEN BRIDGE
HAILSTORM
.NET MY SERVICES

```
graph TD; User((User)) --- Identity((Identity)); User --- Context((Context)); User --- Services((Services));
```

AHEAD OF ITS TIME

- Identity-centric services
- Personal data APIs
- Cross-service orchestration

THE VISION
Identity + Context + Services
Working together

WHY IT FAILED

- ✗ Too much complexity
- ✗ Centralized trust didn't scale
- ✗ Humans still in the loop
- ✗ No intelligence layer

The Internet Keeps Reinventing Itself.
This Time, We Get It Right.

THE FORGOTTEN BRIDGE
